XR CHEST PA LAT - Details

Study Result

Narrative

Patient Name:

CAROL D GRAY

MRN: B0000316232 Birth date: 08/02/1962 Sex: F

Date: 1/09/2007 23:00

At the request of:

Procedure: NIMC Radiology

Northern Illinois Medical Center

01/09/2007 10025 CHEST PAL 1174942

HISTORY: Asthma, cough.

The heart is normal in size with normal pulmonary vessels. There is a vague, thin, linear scar or atelectasis in the left lung base. The lungs are otherwise clear. No obvious mucous plugs are seen. There is no pleural effusion or pneumonia. There is mild scoliosis.

IMPRESSION: Minor linear abnormality in the left lung base be it a scar or atelectasis. Otherwise normal chest with mild scoliosis.
