

If Your School Got a *PDF & Print Permissions* for a DynaNotes Streamlined Science TEKS Title, Here are Some *Simple Reminders* of Important Terms & Conditions from DynaStudy

The Dos

1. Use the DynaNotes content to help the students at your school master the eligible TEKS.
2. Display the relevant section of the PDF for your students during whole group, explicit instruction. This grounds them as to what information is provided in the notes.
3. Print copies of the PDF (one page or all pages, as needed) for your students to reference to complete classwork throughout the year, spiral, and finally study at test time.
4. Allow students to take printed or physical copies home with them to complete homework or study.
5. Use the PDF to create derivative works as you are able, such as a worksheet that has an image of one section of DynaNotes content pasted into it along with questions. **Be sure to add the JPG image of the Required Notices to all derivative works** (ask your principal if you do not have this JPG or email copyrights@dynastudy.com). Print these derivatives for your students to complete at school or home.
6. Give printed or physical copies of the PDF and/or any derivative works to substitute teachers at your school for use with students at your school.
7. Keep guard over all digital versions of the PDF and all digital versions of any derivative works. Share digital versions only with other teachers or administrators who work full time at your school.
8. Report any deviations to copyrights@dynastudy.com.

The Don'ts

1. Do not use the DynaNotes content in any way other than to help students at your school master the eligible TEKS.
2. Do not provide printed or physical copies to anyone outside your school, including district C&I or other personnel (affordable district-wide permissions are available separately: contact sales@dynamotes.com).
3. Do not forget to add the JPG image of the Required Notices to any derivative works.
4. Do not post any digital versions of the PDF or of any derivative works online (e.g., a website, fileshare, server). Do not email or give digital versions to students, substitute teachers, or anyone outside your school.
5. Do not keep concerns to yourself. DynaStudy has learned – *after 13 years of being Texas' leading provider of TEKS-aligned student course notes* – that students benefit greatly from this powerful in-hand, offline resource. Email copyrights@dynastudy.com or call (877) 361-0550 to discuss your needs or address any confusion.

| Streamlined SCN | Printed Booklets* | | |
|-----------------|-------------------|------------|--------|
| Grade 5 Science | 8 pages | DYNBKL-5S | \$5.95 |
| Grade 8 Science | 12 pages | DYNBKL-8S | \$6.95 |
| Biology EOC | 12 pages | DYNBKL-BIO | \$6.95 |

*Available to schools with current print permissions for title. Booklets have sturdy cardstock covers and a matte paper finish for writing/erasing.

DynaNotes Work Because ... Students Work With DynaNotes!
